***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 100 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 100 claims all possible variation, i.e. continuous and discontinuous and therefore there is no further structural limitations recited in claim 100 rendering claim 100 confusing, indefinite, unclear, and vague as to what structural limitations applicant intends to encompass with such language.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 89-101 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis (2003/0167658) in view of either Fellman (2383117) or Minges (6544626).

Davis shows a shoe with a plurality of resilient deformable protrusions (at 5, 6, and 7) on an upper and describes/suggests alternative shapes/patterns for the protrusions (see page 4 lines 1-12 and page 7 lines 13-21). Either Fellman or Minges teaches resilient deformable protrusions with inner and outer contoured shapes. It would have

been obvious to use the shapes/patterns as taught by Fellman or Minges in the shoe of Davis for the deformable protrusion to provide a particular look/design for the shoe.
